

# TECHNICAL INFORMATION DISCLAIMER

## Official Statement Regarding Specifications, Materials & Published Information

Midwest Stratospheric Data Systems ("MSDS," "the Company," "we," or "us") provides the following disclaimer concerning all technical information, specifications, performance claims, timelines, mission details, and related content published in any form.

### 1. Subject to Change

All technical information—including but not limited to payload designs, weights, dimensions, sensor capabilities, telemetry systems, tracker components, construction methods, altitude targets, data collection parameters, recovery systems, launch dates, flight profiles, data-release timelines, and operational procedures—is provided for informational and promotional purposes only. Such information is subject to change at any time based on the evolving needs of the organization, engineering refinements, regulatory requirements, safety considerations, supplier availability, flight conditions, or other operational factors.

### 2. No Binding Commitment from Print or Digital Materials

Any discrepancy between printed materials (including this document, promo packets, press releases, handouts, or other physical media), the official website (midwestsds.com), social media posts, verbal statements, or third-party publications does not create a binding obligation. MSDS expressly reserves the right to modify, update, correct, or withdraw any published information without prior notice. Printed materials may lag behind current website content or internal decisions.

### 3. Website as Primary Source

The most current and authoritative information is maintained on the official website at <http://midwestsds.com>. Users, partners, media, and the public are encouraged to consult the website for the latest specifications, mission status, data availability, and contact details. In the event of any conflict between printed materials and the website, the website content shall control unless otherwise stated in a formal written agreement signed by an authorized representative of MSDS.

### 4. No Warranty on Forward-Looking Statements

Statements regarding planned launches, expected performance, data-release targets (including turnaround times), collaboration opportunities, educational programs, or future capabilities are forward-looking and inherently subject to uncertainty. Actual results may differ. MSDS makes no warranty, express or implied, that any specific technical outcome, schedule, or data product will be achieved on any particular flight or timeline.

### 5. Scope

This disclaimer applies to all MSDS platforms and activities, including the X2Griffon payload, MAD-AP systems, associated electronics and containment units, telemetry under amateur radio license KE9CFY, public data portals, NearSpace Kids educational materials, and any other hardware, software, or content developed or published by the Company.

#### IMPORTANT

By using, relying upon, or distributing any MSDS technical information or promotional materials, you acknowledge that such information is subject to change and that MSDS shall not be liable for decisions made on the basis of outdated or superseded content. For questions or the most current information, contact [launchcontrol@midwestsds.com](mailto:launchcontrol@midwestsds.com).
